

## Project Proposal:

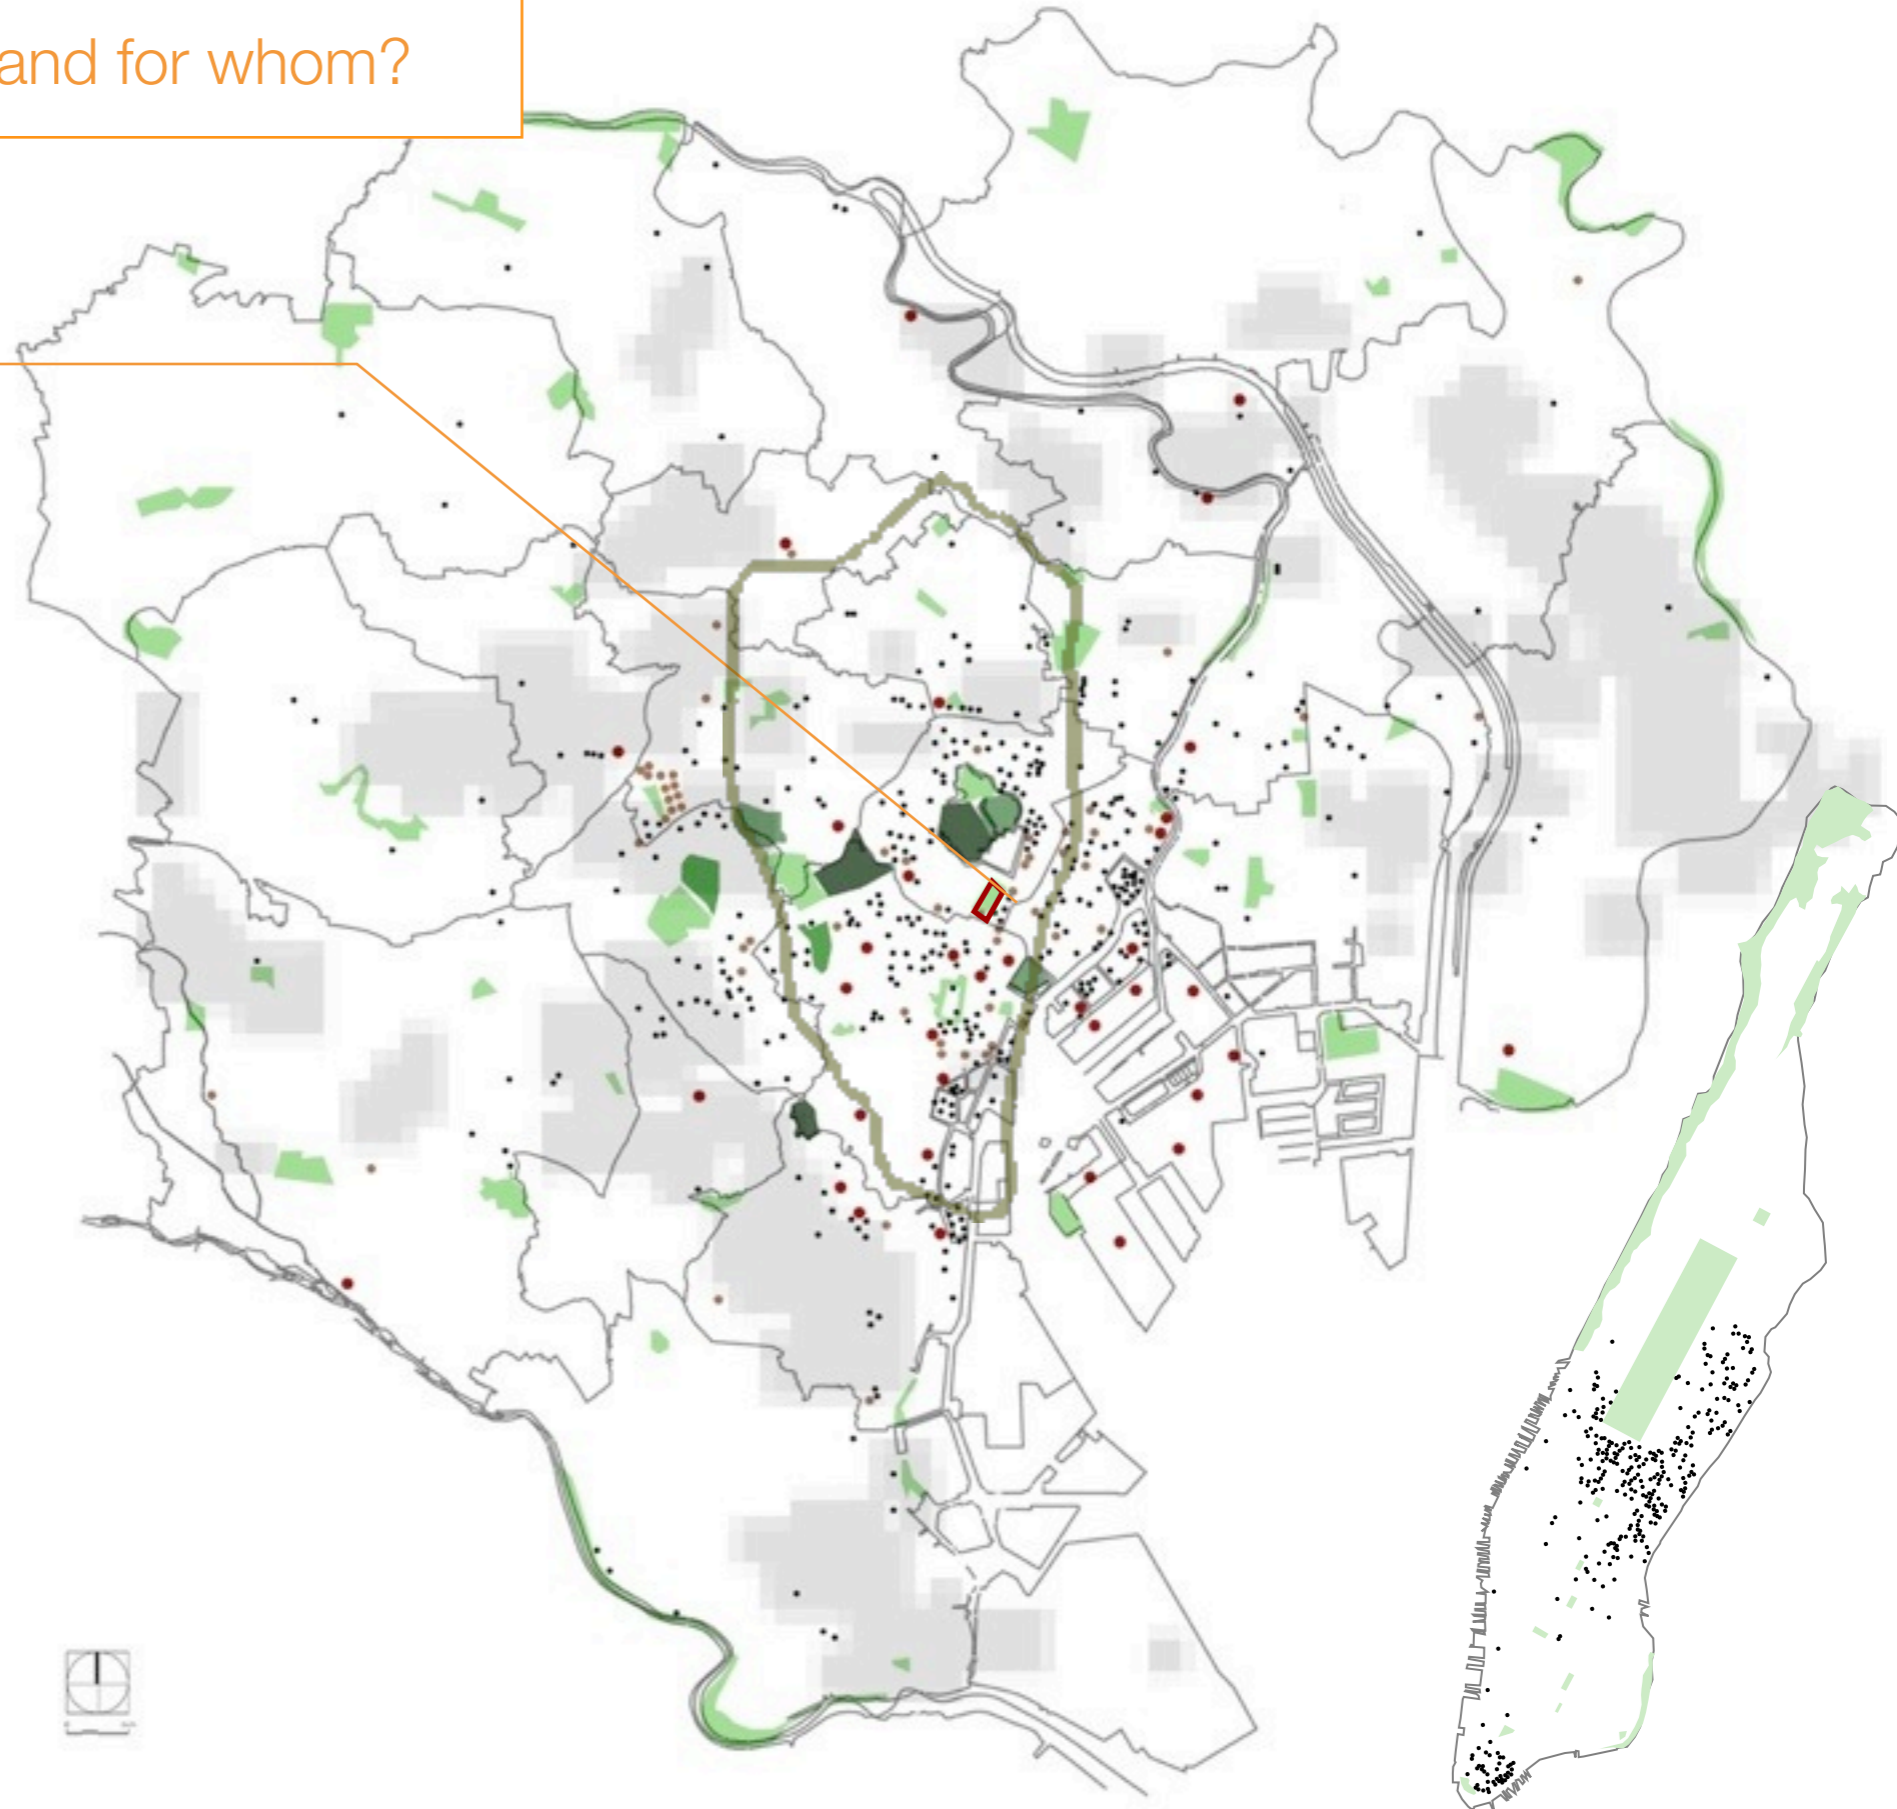

Evaluating Japan's privately owned public space  
Places, People, Policies, Processes, Projects

Which planning instruments/ institutions create which kind of POPS, where, for whom?

kind of incentive	city plan. decision	planning instrument	legal base	number
deregulation-type	needed	① specified block (1961=1964)	BSA	58 (2003)
		② redevelopment type district plan (1988)	BSA	40 (2003)
		③ area of high landuse utilisation (1969)	BSA	104 (2003)
	not needed	④ comprehensive design system (1971)	BSA	674 (2008)
economic type		⑤ green infrastructure development plan	UGSA	5 (2004)
legal obligation type		⑥ development permit (1968)	CPA	300 (2006)

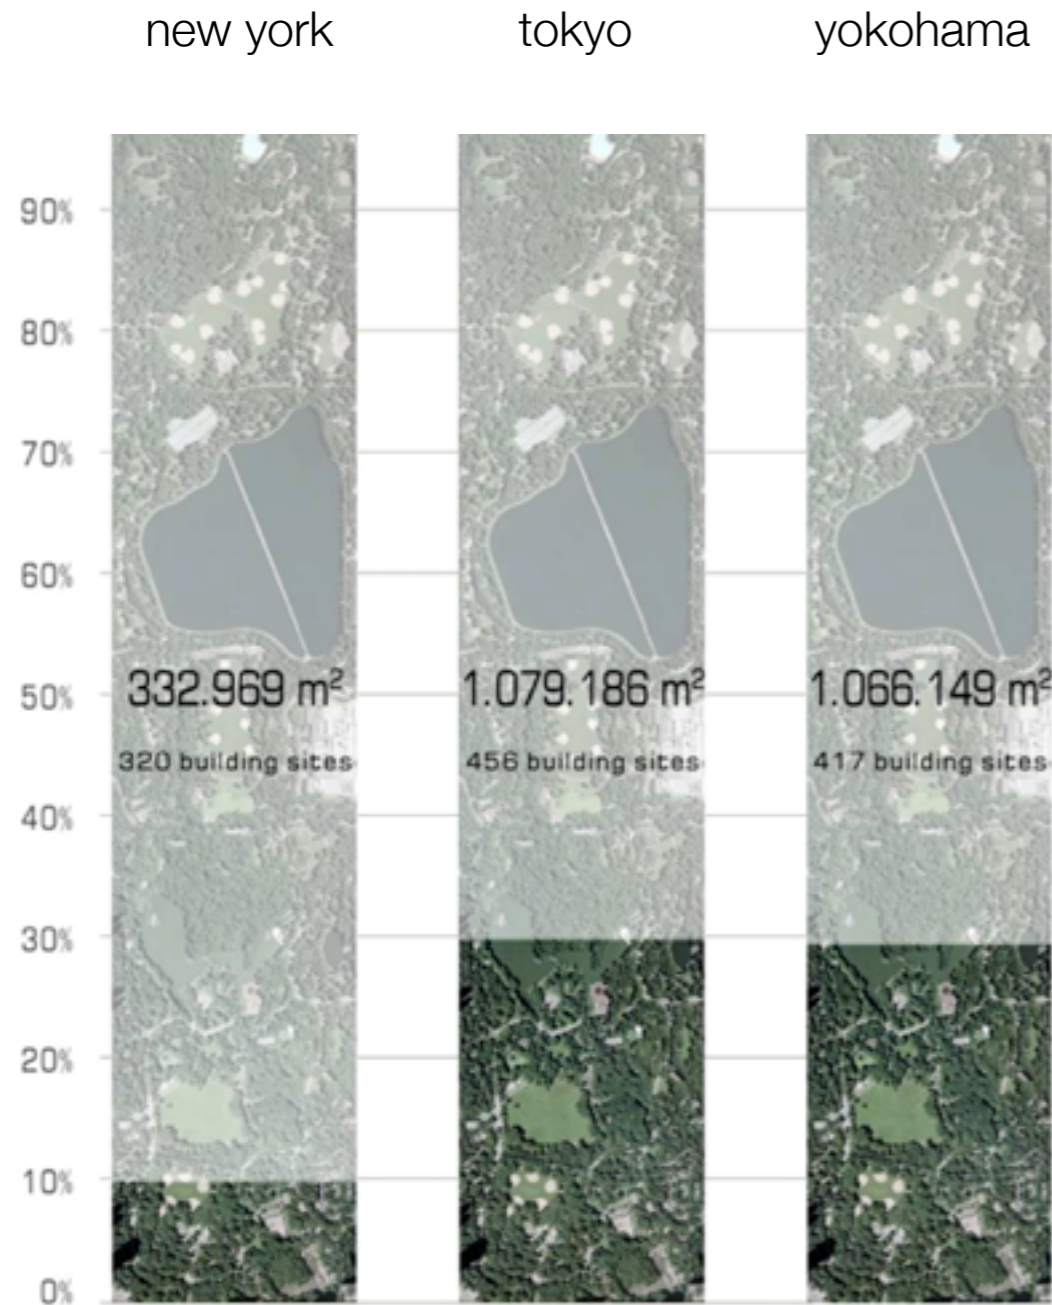

Where are POPS created and for whom?

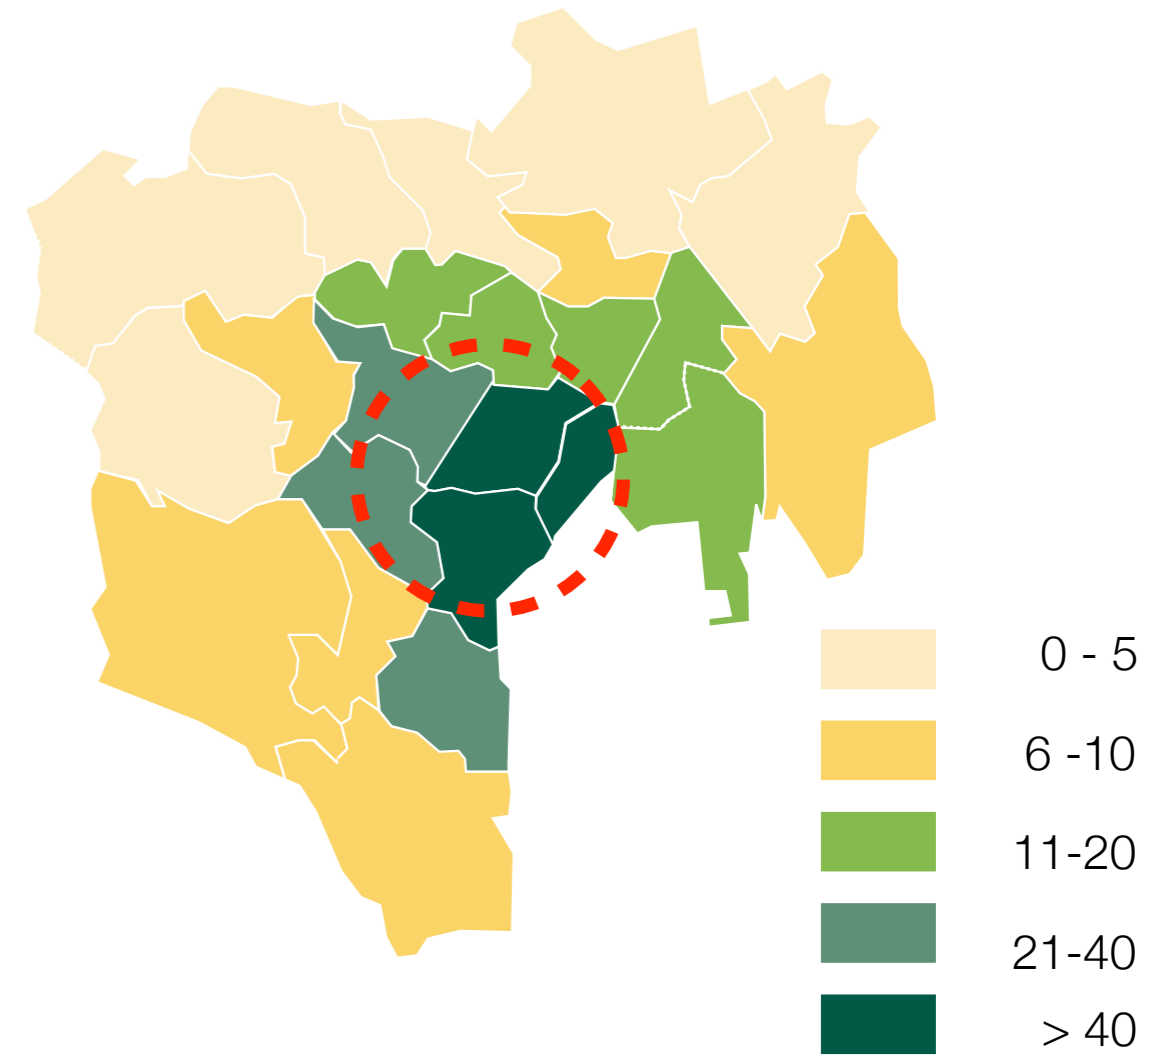

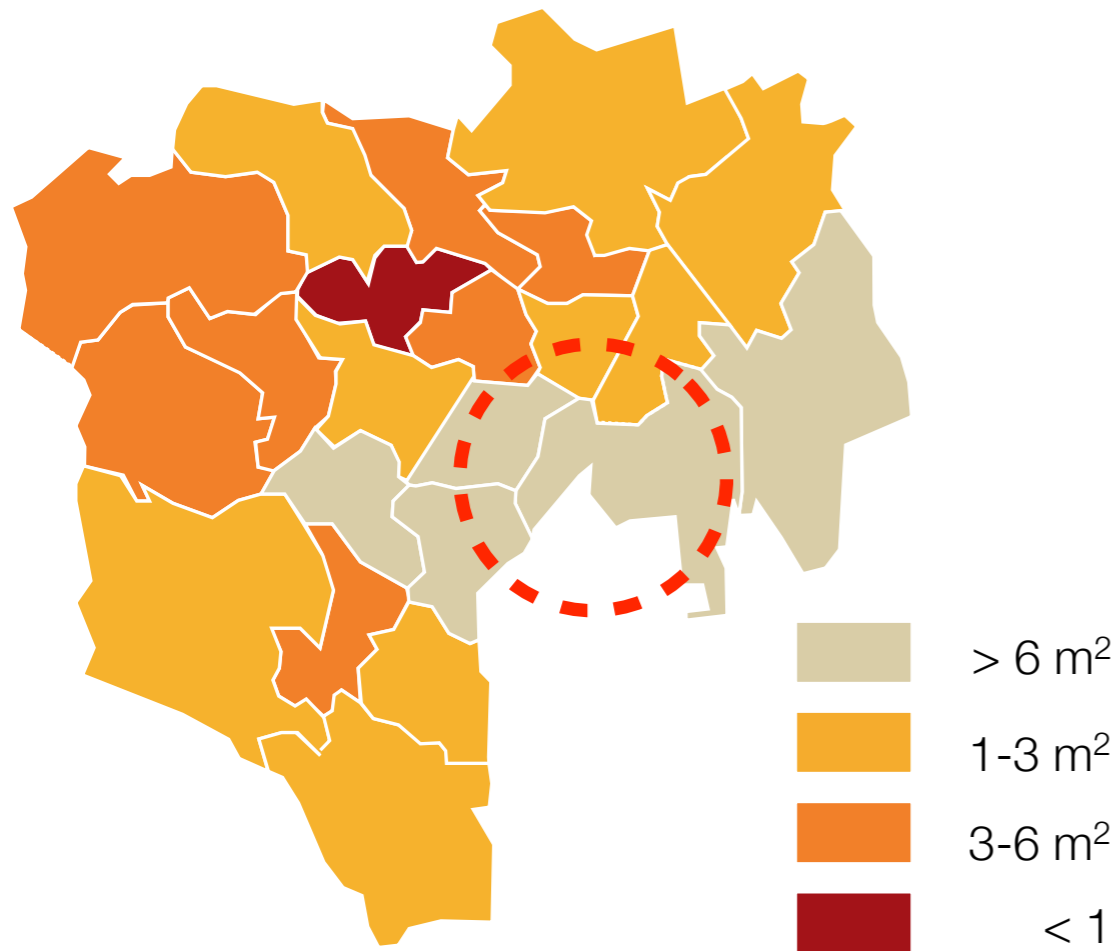

more than 674 places, equaling 11.5 x hibiya park (16ha) (2008)

# How does urban Japan compare to other places?

# Where are POPS created and for whom?

public parks per capita in central tokyo (in m<sup>2</sup>)

number of comprehensive designs in central tokyo

What are the implications if ever more public space is privately owned/ controlled/ managed?

この広場及び通路等は、地区の環境改善・向上に資する施設計画の有効な空地とし、東京都再開発地区計画運用基準に基づき設けられたものです。歩行者が日常自由に通行、又は利用できるものです。

この区域における建築物は、建築基準法第96条第1項の規定に基づき認定を受けたものです。

認定年月 平成14年11月  
認定番号 14都庁再開第 第62号

■ 緑化  
■ 広場状空地  
■ 既存の建築物の敷地

当敷地内では以下の事項及び管理側で規定する禁止事項他人に迷惑を及ぼす行為を禁止しております。

- 自転車進入禁止
- バイク進入禁止
- スケートボード、キックボード禁止
- 許可無効の通行禁止
- 喫煙、飲み込み、喫煙禁止
- 許可無効の通行禁止
- 集合行為禁止
- 許可無効イベント開催禁止
- 許可無効の通行禁止
- 喫煙禁止 (指定の場所以外)
- 飲酒禁止
- ペットの散歩禁止

Historical Survey: What are POPS (公開空地), where did the instrument come from? How did it evolve?

Who are the actors who produce POPS and what are their interests/ resources/ interdependencies/ design intents?

Policy Implications:  
Does the planning policy work? Is it a good deal?

Policy Implications:  
How are POPS used? How CAN they be used?

Policy Implications:  
How to turn POPS into better people places?

## What will the Project TEAM do?

1. Literature Review: What do we know about POPS?
2. Team discussions about what is “good” urban space?
3. Together developing a catalogue of surveying criteria
4. Survey all privately owned public spaces in Tokyo
5. Linking survey data to designers, developers, place specificity
6. Establishing a (public) database with all existing POPS
- ...
7. Producing a book and contribute to international discourses
8. Expanding the project to other Japanese cities

FIRST STEP:  
Discussing the 'good city' and how to measure it

Putting things into context:

space, process,  
governance,  
society, people

- |                            |                               |   |
|----------------------------|-------------------------------|---|
| outdoor POPS               | art, sculpture                | publicly owned public space (e.g. park) |
| covered POPS               | building entrance             | outline Yokohama Station West Exit MCD  |
| building outline           | entrance parking              | MCD wall setback stipulation 3m         |
| discontinuity between POPS | water feature                 | MCD wall setback stipulation 2m         |
| height difference          | vitalising building functions | MCD wall setback stipulation 1.5m       |
| important connection       | permanent encroachment        |   |
